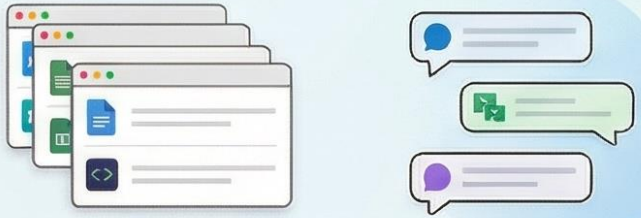
IQ Copilot: Empowering the Enterprise Workspace

Microsoft Edge

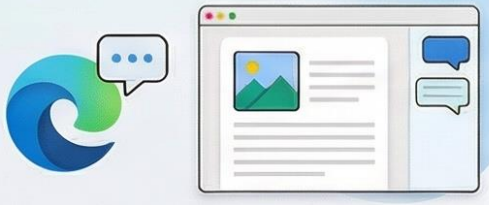
Core Features & Capabilities

Multi-Tab Parallel Workflows



Run up to 10 isolated chat sessions with independent model and skill contexts.

Page-Aware Smart Chat



Instantly analyze, summarize, or translate content directly from the active browser tab.

Unified Enterprise Search

Query internal manuals, product FAQs, and structured specifications using Foundry and Fabric IQ.

Strategic Business Impact

Proactive Productivity Updates

- Morning summary
- Pending action
- Follow-up

Receive automated morning summaries, pending action reminders, and follow-up notifications via WorkiQ.

Streamlined Technical Validation

Reduce lookup time for complex product specs and manuals through specialized semantic agents.

Enterprise-Grade Extensibility

Connect proprietary tools and knowledge endpoints using the Model Context Protocol (MCP).

IQ Platform Integrations & Business Capabilities

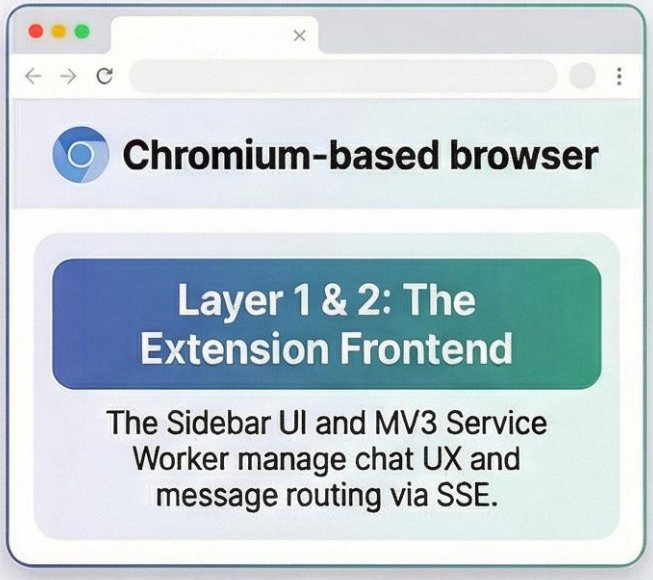
Work IQ

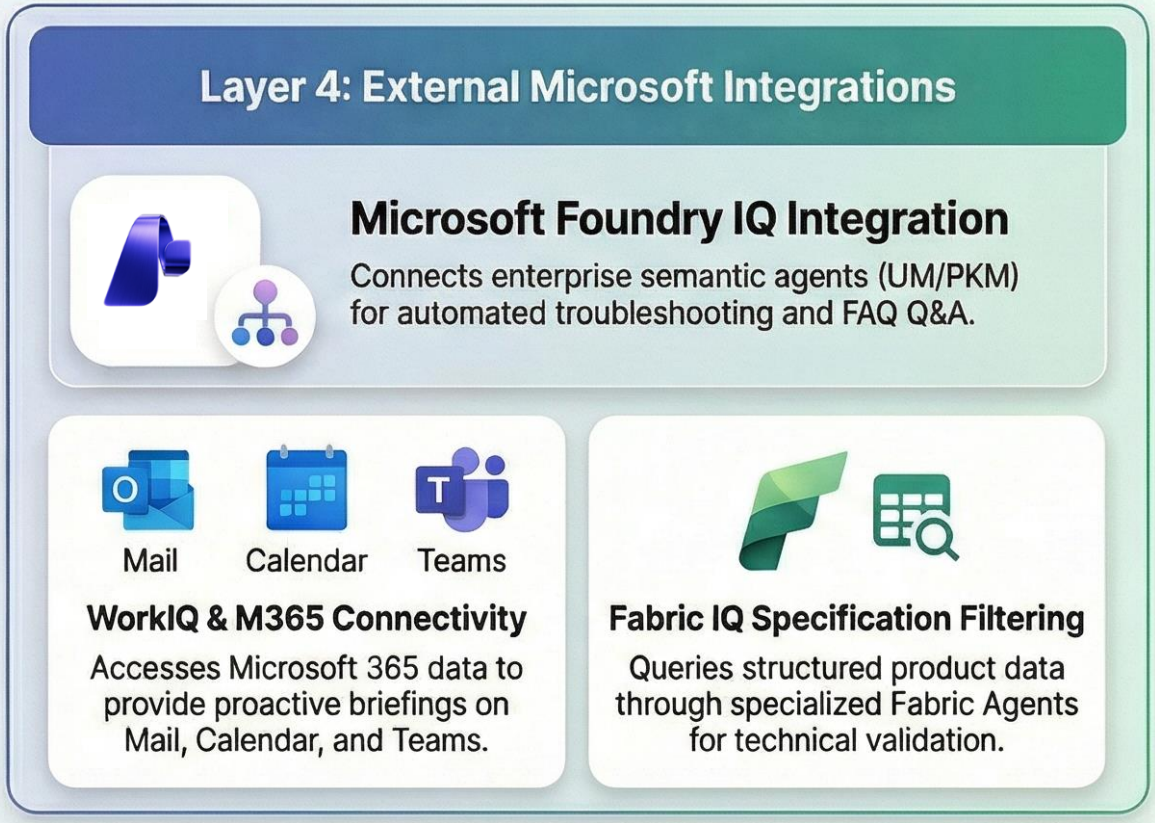
Work IQ: Access to M365 (Mail, Calendar, Teams, OneDrive)

Foundry IQ: Enterprise knowledge agents for manuals and troubleshooting

Fabric IQ: Technical specification filtering and data comparison

IQ Copilot: Bridging the Edge Extension to Microsoft Enterprise AI





IQ Platform	Core Capability	Enterprise Value
Foundry IQ	Knowledge Agents	Faster troubleshooting and manual Q&A
WorkiQ	M365 Data Access	Proactive daily summaries and reminders
Fabric IQ	Structured Specs	Pre-sales comparison and technical validation
